

When completing work, a message may appear to request location. Press "Allow". MMS for security checks the device is located near the dealership before completing work.

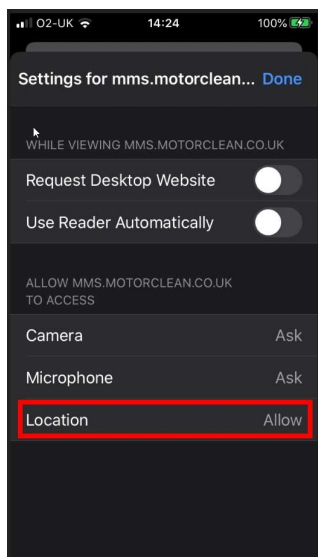

If you get the message "Failed to get location. Location not supported. 1: User denied Geolocation" follow these steps.

Press the “AA” button in the address bar and select “Website Settings”

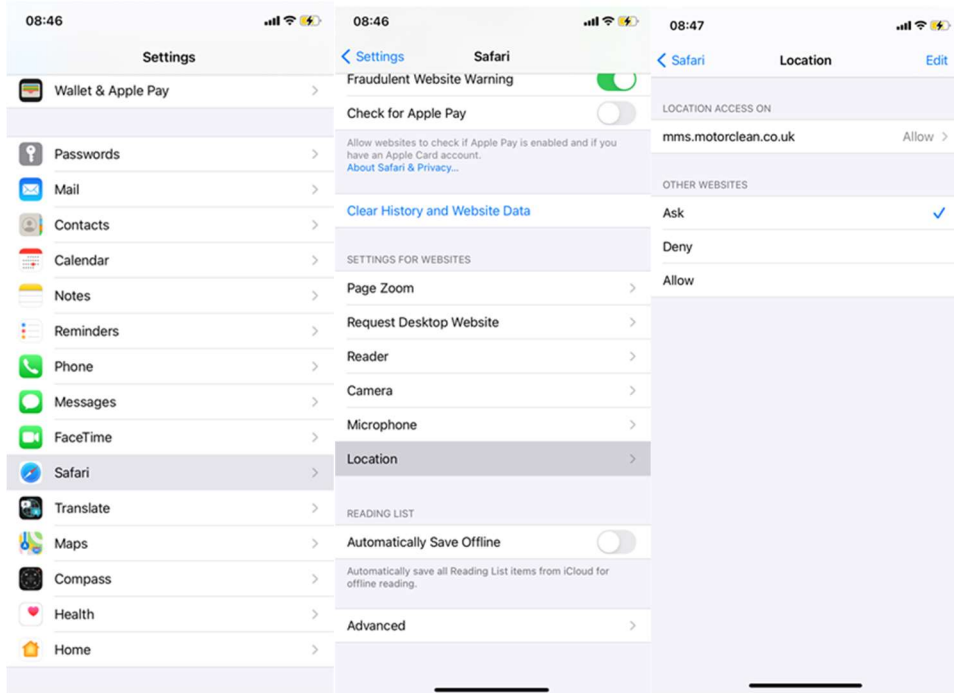

Set the “Location” to “Allow”

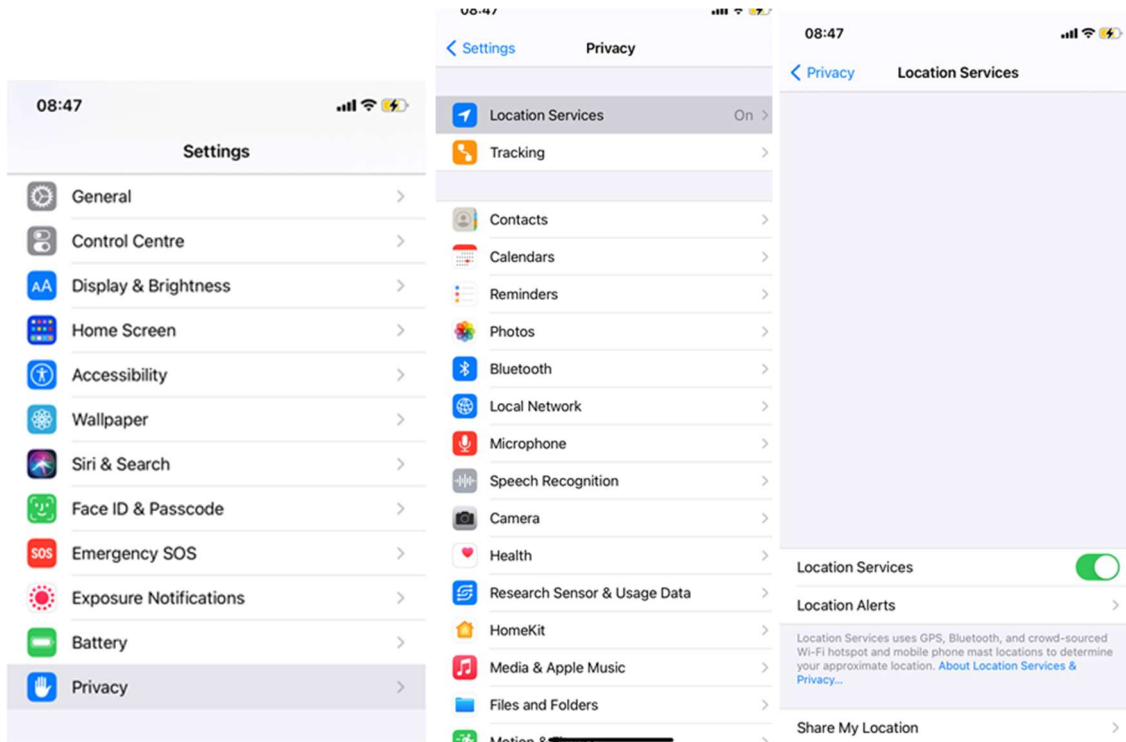

## Check Phone Settings.

In Settings, go to Safari >>> Location >>> And set to either Ask or Allow

(Previously have set MMS to allow Location in this example)

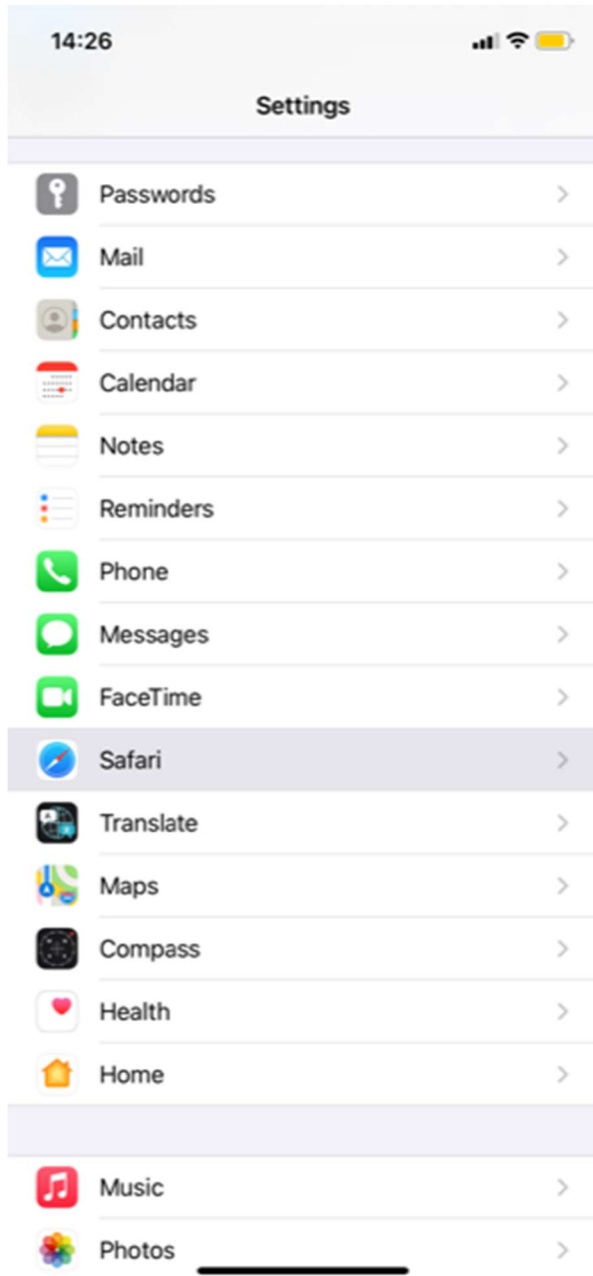

In Settings, go to Privacy >>> Location Settings >>> Toggle to On

For newer iOS versions;

In Settings, go to Safari>>Location then tick Allow for other websites
